

GEAR GUIDE

Backpacks are great for holding gear! We recommend packing non-drawstring backpacks.

We recommend packing bugspray and sunscreen. Please apply initial treatments before arriving at camp.

Reusable water bottles are great to keep your camper hydrated and reduce our impact.

Campers might splash around in our creek, or cool down with water activities. Packing sandals is recommended, and they must have a back-strap!

We pause for 2 snack breaks for all age groups. Please pack snacks in addition to lunch!

Campers will be out on the trails and playing games often! Active footwear is highly recommended!

Please pack your camper a healthy and filling lunch! Campers exert a lot of energy at camp, and eat more than normal.

Please pack sun protection for your campers. Wearing hats and/or sunglasses will keep them having fun in the sun!

Michigan weather is unpredictable! Make sure that your camper brings a warm layer to camp to ensure their comfort.

Camp runs in rain and shine! Bringing a raincoat will ensure your camper stays dry when outside!

Your camper should always have a change of clean, dry clothes! If they use one set up, please send another the next day.
